EDUCATION

Brown University A.B Computer Science and Entrepreneurship Certificate

WORK EXPERIENCE

Microsoft, *Product Manager II on AI Platform/CoreAI*

July 2023 - Present

- Own the **enterprise feature** roadmap for Microsoft AI Platform products-**Microsoft Foundry, Azure OpenAI, and Azure Machine Learning**-covering network isolation, IAM (RBAC, least-privilege access), CMK encryption, data isolation, AI gateway integrations, and secure agent and agent tool connectivity from concept through preview and general availability.
- Translate security-conscious enterprise customer blockers into roadmap priorities and shipped product capabilities, unblocking adoption across financial services, insurance, telecom, manufacturing, healthcare, and public-sector/sovereign AI organizations with compliance requirements **spanning SOC 2, HIPAA, FedRAMP, and GDPR**.
- Own Microsoft Foundry **enterprise admin UX** including user management, connection provisioning, policy enforcement, and the Azure portal networking UX, giving IT and security teams direct control over AI platform access.
- Shipped 0→1 enterprise platform capabilities for secure GenAI workloads, including custom and managed virtual networks, governed third-party AI gateway integrations, and secure agent connectivity for regulated environments.
- Scaled managed network isolation to **10,698 hubs and 206K+ resources**, reaching **75.9% managed-network-only** usage among active customers.
- Partnered with engineering, design, sales, solution architects, and customer success teams to define secure architecture patterns and deliver platform features for regulated AI workloads.
- Drove enterprise self-service through documentation, templates, and setup guidance, achieving **up to 90% self-help deflection rates** for network isolation and identity-related issues.
- Built enterprise enablement through Microsoft Ignite, public blogs, Microsoft Learn documentation, and IaC samples reaching **25K+ views** and **3.4K+ unique visitors in 14 days**.

Microsoft, *Program Management Intern*

Summer 2022

- Lead the Azure Machine Learning and Microsoft Fabric interoperability project.
- Designed UX mocks and high-level spec docs outlining the user experience of sharing models and data.
- Conducted users interviews with top AzureML customers and worked with sales, PMs, engineers, and designers to make data driven and technically feasible recommendations.

EARLY VENTURES

EmpowerU, *Co-founder and Chief Technology Officer*

- EdTech start-up working to address education disparities by providing resources & tools to obtain higher education. Brown Venture Prize 3rd place winner of \$10k grant.
- Built a web application in React Native and hosted on AWS with team of 4 developers and designers.

CodeIT Girls, *Founder and Program Leader*

- Taught programming lessons at local elementary schools with mission to encourage young girls to pursue technology with \$1.5k funding from NCWIT AspireIT Program, in partnership with UNH STEM Discovery Lab.

ALZSPoetry, *Congressional App Challenge Winner*

- iOS App for Alzheimer's patients to listen to poetry recorded by family members, coded in Swift and hosted on AWS. Recreated as a modern web application with Claude Code.
